

## FIBERGLASS MESH

A fiberglass mesh is used in the base/top coat of the Palladium® process during substrate preparation when applying the SCT Palladium® System to approved substrates. This fabric is an open weave fiberglass mesh with a contact adhesive on one side. The fabric weight is 4 ounces per square yard or 135 grams per square meter.

For applications where impact protection is required, a higher impact resistant fabric is also available that is 14 ounces per square yard (473 grams per square meter). Please contact us for further information about this product.

**Manufacturing Facility:**  
Sealants & Coatings Technologies, Inc.  
106 Industrial Way  
Charlestown, IN 47111
